

DYNAMIC iSHARES ACTIVE CANADIAN DIVIDEND ETF

INNOVATIVE. FORWARD-THINKING. RELEVANT.

Favoured for their competitive pricing and ease of trading, Exchange Traded Funds (ETFs) have been steadily increasing in popularity. As more advisors and investors turn to ETFs to form a part of their investment plan, the demand for active management within the structure has increased. Actively managed ETFs can help meet this demand as they have the power to differentiate client portfolios by uncovering opportunities beyond the benchmark.

DXC

DYNAMIC iSHARES ACTIVE CANADIAN DIVIDEND ETF

Dynamic iShares Active Canadian Dividend ETF invests primarily in a diversified portfolio of equity securities of Canadian-based businesses that pay or are expected to pay a dividend or distribution. Exposure to these types of securities will be obtained indirectly by investing primarily in the Dynamic Active Canadian Dividend Fund¹.

- Utilizes a bottom-up approach and fundamental analysis to assess growth and value potential.
- Targets companies that are attractively valued, have high margins and market share, and are run by quality management teams.
- Has the flexibility to access businesses located outside Canada.

³ Dividend Reinvestment Plan ("DRIP") program is available, allowing investors to easily benefit from compounding their distributions. All Dynamic iShares Active ETFs are eligible for the Dividend Reinvestment Plan, provided that the Advisor's brokerage firm supports participation in the DRIP. Cash distribution rates are declared at the sole discretion of the manager and may be changed periodically without notice to investors. While achieving consistency from period to period is one factor in determining a given cash distribution rate, other factors, including the amount of income earned by the fund, may affect the cash distribution rate declared in a given period.
